Prescription Medications, Over-the-Counter Drugs, Herbs & Chemicals Associated with Tinnitus

The following list contains all the drugs, herbals and chemicals that have been reported as being associated with tinnitus and were known to the author at the time of compiling this document.

Although this list is one of the most complete listings of drugs associated with tinnitus, no list of this kind can ever be totally complete. New drugs are coming to the market all the time. Furthermore, some existing drugs not listed here will be found to be associated with tinnitus in the future. Therefore, use this list as a guide and discussion tool with your doctor, and as a springboard to further research on any drugs you may be taking or are considering taking.

More than 966 drugs, 14 herbals and 29 chemicals are currently associated with tinnitus. However, just because a drug is listed here does not mean that you will automatically get tinnitus or exacerbate your existing tinnitus if you take it.

Some drugs result in tinnitus occurring in a high percentage of those taking it. With other drugs, tinnitus only seems to occur rarely. Sometimes the resulting tinnitus is permanent. Other times the tinnitus goes away in a few days to a few weeks. Sometimes the tinnitus is mild. Other times it can be so loud that it is debilitating.

Whether or not you experience tinnitus after taking one of the listed drugs or herbals, or after being exposed to one of the listed chemicals, depends on many factors such as your own body chemistry, your sensitivity to drugs, the dose you take, the length of time you take the drug, etc. Therefore, use this document as a preliminary tool in your quest to discover whether one of the drugs listed here is causing your tinnitus or making your existing tinnitus worse.

For more detailed information on the probability (risk) of getting tinnitus from taking any drug, as well as a guide to the likely severity and permanence of any resulting tinnitus for any drug, herbal or chemical listed here, see the latest edition of the author's book, ***Ototoxic Drugs Exposed***, (most of the drugs listed here are listed in the 3rd edition, but numbers are not in the 3rd edition, but will be listed in the upcoming 4th edition). In addition, this book lists information about the other ototoxic (ear-damaging) side effects of these drugs such as hearing loss, hyperacusis, ear infections, ear pain and a number of balance problems.

If you wish to learn more about tinnitus and how you can help yourself bring it under control, see the author's book **Take Control of Your Tinnitus—Here's How** now in its seventh edition. (The greatly-expanded 8th edition will be available late in 2021.)

You can obtain a copy of either of these books on the Center's website at: <https://hearinglosshelp.com/shop/category/books/>.

If you experience tinnitus (or any other side effects), you should not discontinue taking any prescribed medication without contacting your prescribing physician.

Drug brand names are *italicized*. Generic drug names are in **bold**. Please note that not every brand name is included as some drugs have numerous brand names. Therefore if you don't find the brand name of the drug you are looking for, look for that drug's generic name. Generic Drugs separated by a "—" indicate that the drugs have two generic names or slightly different spellings of their generic names. Generic names separated by a "/" indicate that the two drugs are typically always combined in one pill and not sold or taken separately.

Aspartame

B

Benzenamine (Aniline)

Benzene

Benzene hexachloride (Lindane)

Benzenol (Phenol)

Benzinol (Trichloroethylene)

Benzohydroquinone (Hydroquinone)

Benzol (Benzene)

Benzolene (Benzene)

Beta-quinol (Hydroquinone)

Blue oil (Aniline)

Bonoform (Tetrachloroethane)

Bromoaniline

Butoflin (Deltamethrin)

Butoss (Deltamethrin)

Butyl methyl ketone (Hexanone)

C

Camphor

Carbinol (Methyl alcohol)

Carbolic acid (Phenol)

Carbon dichloride (Tetrachloroethylene)

Carbon monoxide

Cellon (Tetrachloroethane)

Chlorilen (Trichloroethylene)

Chloromethane (Methyl chloride)

Cislin (Deltamethrin)

CO (Carbon monoxide)

Columbian spirit (Methyl alcohol)

Crackdown (Deltamethrin)

Cresol mixture

Cyanol (Aniline)

Cyclohexane

D

D-Camphor (**Camphor**)

Decis (**Deltamethrin**)

Deltamethrin

DFMO (**Difluoromethylornithine**)

Dichlorodifluoromethane

Dichloromethane (**Methylene chloride**)

Difluoromethylornithine

Dihydroxybenzene (**Hydroquinone**)

Dipropyl (**Hexane**)

Dukeron (**Trichloroethylene**)

E

Equal (**Aspartame**)

Eskimon 12 (**Dichlorodifluoromethane**)

Ethanol

Ethenylbenzene (**Styrene**)

Ethyl alcohol (**Ethanol**)

Ethyl hydrate (**Ethanol**)

Ethylene tetrachloride (**Tetrachloroethylene**)

Ethylene trichloride (**Trichloroethylene**)

F

Fluorocarbon (**Dichlorodifluoromethane**)

Freon (**Dichlorodifluoromethane**)

Frigen 12 (**Dichlorodifluoromethane**)

G

Germalgene (**Trichloroethylene**)

Grain alcohol (**Ethanol**)

H

Hexahydrobenzene (**Cyclohexane**)

Hexamethylene (**Cyclohexane**)

Hexanaphthene (**Cyclohexane**)

Hexane

Hexanone

Hexit (**Lindane**)

Hexyl hydride (**Hexane**)

Hydroquinone

Hydroxybenzene (**Phenol**)

K

K-Otek (**Deltamethrin**)

K-Othrin (**Deltamethrin**)

Kwell (**Lindane**)

Kyanol (**Aniline**)

L

L-Aspartyl-L-phenylalanine methyl ester (**Aspartame**)

L-Camphor (**Camphor**)

Lead

Lindane

M

M-,P-Cresol mixture (**Cresol mixture**)

Mercury

Methacide (**Toluene**)

Methane dichloride (**Methylene chloride**)

Methyl chloride

Methyl hydroxide (**Methyl alcohol**)

Methyl N-butyl keytone (**Hexanone**)

Methylbenzene (**Toluene**)

Methylbenzol (**Toluene**)

Methylene chloride

Mineral naphtha (**Benzene**)

Molasses alcohol (**Ethanol**)

Monochloromethane (**Methyl chloride**)

N

Narcogen (**Trichloroethylene**)

Narkotil (**Methylene chloride**)

N-Hexane (**Hexane**)

NutraSweet (**Aspartame**)

O

Octafluoropropane (**Perfluoropropane**)

Oxybenzene (**Phenol**)

P

P-Benzenediol (**Hydroquinone**)

P-Bromoaniline (**Bromoaniline**)

P-Bromophenylamine (**Bromoaniline**)

P-Cresylic acid (**Cresol mixture**)

Perchlor (**Tetrachloroethylene**)

Perchloroethylene (**Tetrachloroethylene**)

Perclene (**Tetrachloroethylene**)

Perfluoropropane

Perklone (**Tetrachloroethylene**)

Petzinol (**Trichloroethylene**)

Phenol

Phenyl hydroxide (**Phenol**)

Phenylethylene (**Styrene**)

Phenylic acid (**Phenol**)

Phenylmethane (**Toluene**)

Potato alcohol (**Ethanol**)

P-Oxytoluene (**Cresol mixture**)

Pyrobenzol (**Benzene**)

Q

Quinol (**Hydroquinone**)

S

Skellysolve B (**Hexane**)

Solaesthin (**Methylene chloride**)

Spirits of wine (**Ethanol**)

Styrene

Styrol (**Styrene**)

T

Tecquinol (**Hydroquinone**)

Tetracap (**Tetrachloroethylene**)

Tetrachloroethane

Tetrachloroethylene

Tetroguer (**Tetrachloroethylene**)

Threthylene (**Trichloroethylene**)

Toluene

Toluol (**Toluene**)

Trichloran (**Trichloroethylene**)

Trichloroethylene

Trilene (**Trichloroethylene**)

V

Vestrol (**Trichloroethylene**)

W

Westron (**Tetrachloroethane**)

Wood alcohol (**Methyl alcohol**)

Wood naphtha (**Methyl alcohol**)
